

# Analytics Agents

## Analytics Agents reason across your data stack and bridge insight-to-action

Automate work with intelligent agents that query disparate data sources, analyze the numbers, and take action: create tickets, escalate incidents, trigger APIs and webhooks, and notify your team. WisdomAI Analytics Agents reason across the enterprise data stack with context supplied by the Adaptive Context Engine in every workflow run.

### Reason and act across the entire enterprise data stack

More than 200 connectors to CDWs, ERPs, SaaS Apps, file stores, MCPs, and APIs. Analytics Agents have privileged, secure, and governed access to every data source managed by data admins with the Adaptive Context Engine.

### Automate work and bridge insights-to-action

WisdomAI Agents automatically report data anomalies, trigger webhooks or APIs on other systems, write to CDWs or third-party SaaS apps, and send completed deliverables via Slack or email.

### Trust & accuracy powered by the Adaptive Context Engine

The Adaptive Context Engine supplies business context, ensuring Analytics Agents know what matters. Unlike lossy LLM Agents that rely on inference-based text, WisdomAI preserves data integrity across workflows for deterministic outputs.

# How WisdomAI Analytics Agents work

## Plan

- Define the workflow
- Set the parameters
- Connect data sources
- Configure schedule

## Analyze

- Query the data stack
- Reason over results
- Apply context
- Maintain governance

## Decide

- Evaluate conditions
- Branch on logic
- Self-correct if needed
- Select next action

## Act

- Generate artifacts
- Send alerts / emails
- Update dashboards
- Trigger downstream

## Security you can trust

### Enterprise-grade certifications

- SOC 2 Type II
- HIPAA and GDPR compliant
- RLC, CLS & RBAC at query time

## Flexible deployment models

- SaaS, VPC, On-Prem
- Bring your own LLM support
- Single-tenant by design
- Hosted in your cloud or ours

WisdomAI Agents helped us deliver daily intelligence to our client-facing teams, enabling them to engage clients proactively with timely insights.
